OBJECTIVE

To gain hands-on experience, enhance my technical expertise, and strengthen problem-solving skills in a professional environment.

EDUCATION

Bachelor's in computer sciences

Lahore Garrison University

Fall 2022 - Fall 2026

- **Major:** Computer Sciences
- **Minor:** Computer Programming and Software Engineering
- **Related coursework:** Communication, Business ethics, Workflow management, Operating Systems, Database design and administration, System design and diagramming, Data structures and algorithms and extreme programming.
- **Interests:** Python development, Machine learning, Backend development, System design, Cloud computing, Dev-ops, and Web development

PAST PROJECTS AND EXPERIENCES

Responsive Barbershop Appointment Booking Website

- Developed a responsive web application for a barbershop using React.js, JavaScript, HTML, CSS, and Bootstrap, enabling users to view barber profiles, rate services, and schedule appointments.
- Implemented a clean, mobile-friendly interface with real-time form validation and booking features to ensure smooth and accessible user interaction.
- Focused on optimizing UI/UX for seamless navigation across devices and enhanced customer satisfaction.

AI-Powered Chatbot for Barbershop Website

- Integrated an AI-powered chatbot into the barbershop website to automate appointment bookings and answer user queries such as business hours, service availability, and working days.
- Utilized Flask for backend development and connected with open-source AI APIs to enable accurate, real-time conversational responses.
- Enhanced customer engagement by streamlining support, improving booking efficiency, and reducing manual workload.

Weather Forecasting Web Application

- Designed and developed a weather forecasting application using the MERN stack to display real-time city-based weather information.
- Integrated third-party REST APIs to fetch and present live temperature, humidity, and weather conditions through a dynamic user interface.
- Ensured responsive design and optimized loading speed for seamless user experience across platforms.

Grocery Management System

- Developed a console-based Grocery Management System using C++ and object-oriented programming to manage product inventory and sales transactions.
- Applied principles like encapsulation and modularity for clean and scalable code structure.
- Enabled efficient handling of product records and billing operations through an interactive command-line interface.

E-commerce Database System

- Designed and implemented a relational database for an e-commerce platform using SQL, managing customer data, product inventory, and transaction records.
- Wrote optimized queries and reports for inventory tracking, customer insights, and sales analytics.
- Focused on schema normalization and indexing to ensure efficient and scalable data handling.

EXPERIENCE

1

Intern Web Developer

- Assisted in the development and maintenance of responsive web applications, contributing to frontend design using HTML, CSS, JavaScript, and React.
- Gained hands-on experience with version control systems (Git), collaborated with senior developers on debugging and optimization tasks, and participated in sprint planning and project discussions.

**June 2024 – Aug
2024**

Intern Virtual Assistant – Amazon

A2Z IT Solution, Lahore (On-site)

- Managed and optimized digital platforms, leveraging analytical tools to enhance social media engagement and website functionality; gained hands-on experience in website administration, workflow optimization, and data-driven decision-making.
- **Customer Support and Technical Assistance:** Provided technical guidance to clients on enrollment and support platforms; utilized cloud-based tools for remote collaboration and contributed to improving user experience through detailed feedback and problem resolution.

**Nov 2025 – Jan
2025**
